AED Trainer | XFT-120C+ |

Product Introduction

XFT-120C+ (AED trainer) is designed for emergency personnel in the use of training before use the real clinical AED. The training machine fully simulate the scenario of the clinical AED's guide and procedures. The aim is to help emergency personnel familiar with the clinical AED, and master the use of the AED's essential operational skills when do the first aid.

Features

- It is completely compliant with AHA new guidelines, and pre-configured with 8 or 10 training scenarios that simulate realistic sudden cardiac arrest episodes.
- The XFT-120C+ AED trainer is designed with a replaceable plug-in card allowing the device to be customized by uploading different languages and scenarios (optional).
- When guidelines are changed, customers only require a new plug-in card to update the scenarios.
- With different cards, one unit can offer different languages (optional). Currently there are 20 languages available, additional languages can be provided if required. It is bilingual, also has remote control function.
- A metronome is added to the flashing lights when the unit is counting out the 2 minutes for CPR.
- The sound prompts 100 or 110 compressions per minute to help the trainers perform CPR properly.
- Our AED trainer comes with DC and audio interfaces. The DC interface allows users the options of connecting to the mains adapter(DV 4.5V, 300mA) or using batteries. The audio out interface enables the user to connect the external speakers which is helpful for instructors during teaching.
- Five pairs of pads are included in the package. With a choice of adult or pediatric pads.
- Fully auto and semi auto scenarios (selectable).
- XFT AED trainers are chosen by training organizations all around the world.

Functions

- XFT-120C + "AED trainer " has the analog electric shock function. But it does not provide high voltage, to ensure the safety of the use of the process.
- XFT company by use electronic process simulation technology to let the AED trainer can judge electrode's reaction on the human body. It is simulate the real AED to analyse whether the electrode truly connect on the patients body, This is the company 's unique technology. XFT-120C + "AED trainer" can be used with any other manikin.
- XFT-120C + "AED trainer" preset 8 or 10 training modes, each mode is simulate the real situation of the heart sudden cessation events, these modes meet the latest international standards of training.
